06/23/17

The following is a more detailed update of the construction to take place for the I-91 Rockingham Bridges #24S & 24N project over the Williams River for the week beginning June 26, 2017.

Golden Hill Road activities:

Monday thru Friday:

- Continued construction of lower access road
- Continued steady truck traffic with traffic control present.
- Pumping of stream water around the work area will continue early in the week. Upon completion of the bypass culvert the pumping should change over to just daily. Hoping for mid-week but it is weather dependent.
- Installation of sheet pile coffer dam begins at the end of the culvert.

I-91 activities:

Monday thru Friday:

- Median crossover work continues.
- Continued daytime northbound left lane closure.
- Smart work zone equipment to be installed on I-91 allowing for information on traffic flow and potential delays.

Motorists merging onto I-91 via Exit 6 northbound on ramp are urged to use extreme caution and yield to I-91 northbound traffic.

Please note the posted speed limit on I-91 within the construction zone will be reduced to 55mph and will be strictly enforced.
